Please note that currently MathBase is only compatible with Microsoft Windows Operating Systems. For successful operation of the software it is essential that children have access to a mouse or other pointing device that is in good working order and a sound system that can be heard clearly.

MathBase1 is suitable for children as young as three years and upwards. The first program 'Number 10' has many simple matching exercises that allow young children to make progress in small steps at their own speed. Once started, the material on the CD will continue to support the acquisition of important number skills for years to come.

CD	Content Description
MathBase1	Whole number 0 to 100, Number Bonds and Tables Practice
